Subject: Microsoft Settlement

I believe that the Microsoft settlement was improperly crafted and has several large issues either handled poorly or not at all. Since most of these issues have been commented on by other people. I will not list them here. However sites such as <http://www.kegel.com/remedy/letter.html> do a good job of listing the major issues. I believe this settlement to be totally unacceptable and is just lip service to addressing the improper conduct and monopoly Microsoft carries on. Another settlement needs to be drafted, addressing the shortcomings of this settlement and other facets of this case that were not addressed.

Sincerely,
Terry Melton
